PROFESSIONAL SUMMARY

Backend Developer and BS Artificial Intelligence student with hands-on experience in Python and Django development. Skilled in building database-driven web applications, designing backend systems, working with relational databases, and developing practical software solutions. Experienced in Django, PostgreSQL, MySQL, REST APIs, and AI-related technologies, including building a production-grade Django system with 51 database models and 127 URL routes across 13 feature apps. Currently focused on backend development and building scalable, maintainable applications that solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Backend Development: Django, Django REST Framework, REST APIs

Databases: PostgreSQL, MySQL, SQLite

AI & Machine Learning: NumPy, Pandas, Matplotlib, OpenCV, Face Recognition, YOLO

Frontend & Styling: Tailwind CSS

Tools & Technologies: Git, GitHub, VS Code, Postman

Other Technical Skills: Arduino, Serial Communication

PROJECTS

GSMS — General Store Management System

Technologies: Python, Django, PostgreSQL, Tailwind CSS, JavaScript

Developed a comprehensive Django-based General Store Management System (GSMS) to manage and streamline core retail business operations, providing an integrated platform for products, inventory, purchases, sales, customers, suppliers, financial transactions, and business records.

- Designed 13 feature apps/modules covering 13+ major business domains, including products, inventory, purchases, sales, customers, and suppliers
- Modeled 51 database models in PostgreSQL to support product and inventory management, with low-stock and expiry tracking
- Implemented purchase and sales management with customer and supplier ledger tracking across 10+ core business workflows
- Built 127 URL routes (path()) powering 50+ major platform features
- Implemented expense and income tracking with profit calculation and financial management
- Configured 42 Django Admin registrations for centralized data management, audit logging, and business record management
- Delivered a responsive web interface using Tailwind CSS

GitHub: github.com/MFaizan108/GSMS-Django-Project **Portfolio:** portfolio-rt8j.onrender.com

Portfolio Website

Technologies: Python, Django, HTML, CSS, JavaScript

- Personal portfolio site with a responsive design, built and deployed to showcase the GSMS project and other work alongside technical skills

EDUCATION

Bachelor of Science in Artificial Intelligence (BS AI)

The Islamia University of Bahawalpur (IUB) • Expected Graduation: 2028

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Artificial Intelligence, Machine Learning

SELF-DIRECTED LEARNING — BACKEND DEVELOPMENT & ARTIFICIAL INTELLIGENCE

Continuously developing technical skills through self-directed learning, official documentation, online courses, and practical projects. Focus areas include:

- Python Programming
- Django & Backend Development
- Database Management
- REST API Development
- PostgreSQL & MySQL
- Object-Oriented Programming
- Data Structures & Algorithms
- Artificial Intelligence & Machine Learning
- Computer Vision
